Suggest some of the reasons to "baseline the data".

Answer ([Please click here to Add Answer](#))

Baseline

In order to use the data for estimation and drawing conclusions, it must be base-lined. In the baseline, data from past projects is collected, cleaned, and put in a database. Such metrics baseline is used to reap benefits at the process, project, and product level.

N_f = Functional requirements = 25

N_{nf} = Non-functional requirements = 5

N_{ui} = number of requirements for which all reviewers had identical interpretation = 10

Calculate the "Lack of Ambiguity" in the requirements given in specification.

Answer ([Please click here to Add Answer](#))

Use this formula

$$N_r = N_f + N_{nf}$$

where

N_r - total number of requirements

N_f - functional requirements

N_{nf} - non-functional requirements

Now lack of ambiguity in the requirements is calculated as:

$$Q_1 = N_{ui}/N_r$$

Where

N_{ui} - number of requirements for which all reviewers had identical
