

BT-406

QUIZE 1&2

Warrior group of zoologist

1. Scientific research must be based on _____ **logical reason**.
2. Researcher are human beings , having individual idiologies , religiou affilitions , cultural differences which _____ - **influence the research findings** .
3. Self study reviews the reader's confidence. _____ **increases**.
4. The..... Simply states that there is no relationship between the variable zero _____ **null hypothesis**.
5. Select the most appropriate _____ **study of research methods provides you the knowledge and skills you need to analyze problem and find a solution**.
6. Moving up the ladder of abstraction , the basic concept becomes more abstract , wider in scope _____ **susceptible to measurement** .
7. Focus should be made on that kind of applied research that should have _____ **given new theories and principles**.
8. Increase in the percentage of falling students in a university exam may have many reasons like ____ **ALL above**.
9. Following is a type of confounding factors that effects the relationship between X and Y variables and is ur _____ **Extraneous variable**.
10. is a coherent set of general prpositions used as principles of explanations of the ap..? phenomenon _____ **theory** .
11. A proposition that can be verified to determine its reality is a _____ **hypothesis**.
12. are the two puposes of developing a theory . _____ **prediction and understanding**.
13. A framework is conceptual modal of how one theorizes or makes logical sence of a relation have been identified as important to the problem under study . _____ **theoretical** .
14. A business researcher may theorize that older investor tend to be more interested in investment income once verified should allow researchers to predict _____ **importance of expected profit on the basis of investors age** .

15. Descriptive research shows _____ **specific details of a situation social setting or relationship.**
16. In order to establish a cause and effect relationship between two variables , we perform _____ **experiments.**
17. Dictionary definitions are also _____ **conceptual , theoretical and related .**
18. Relationship in hypothesis is proposed by using a strong logical _____ **argumentation.**
19. A concept is a generalized idea about a class of objects , attributed occurrences , or processes that has _____ **name .**
20. The scientific researchers try to explain the emerging phenomenon by _____ **identifying the cause .**
21. How research and theories help each other _____ **research produces facts and facts produces theories .**
22. Study of research method provide you the knowledge and skills you need to analyze a problem and _____ **yes .**
23. It is used for testing the hypothesis formulated by the researcher _____ **null hypothesis.**
24. Therefore one can say that a hypothesis is a variable counterpart of a _____ **proposition**
25. The process of establishing the value judgment based on evidence about the achievement of the _____ **evaluation research .**
26. Y variable is the independent , variation of which is accounted for by X variable . do you think the variation in dependent also be caused by factors other than X ? _____ **yes.**
27. Researchers are concerned with the observable world , or what we may call as reality , theorists translate the conceptualization of reality into _____ **abstract ideas.**
28. The Simply states that there is no relationship between the variable zero _____ **null hypothesis.**
29. Literature reviews and theoretical review are _____ **different .**
30. Strong relationship between the library facility (X) . determine what is the type of That modifies the _____ **moderating variable**
31. The type of relationship in which the nature of relationship is not specified is called _____ **non-directional relationship.**
32. Research produces knowledge which can be used _____ **to solve problem and generate theories principles and laws.**
33. Following is not a type of hypothesis _____ **objective hypothesis.**

34. We can divide research into cross-sectional research and longitudinal research on the basis of _____ **time dimension based.**
35. Science actually depends upon a continuous stimulation of _____ **facts.**
36. Important characteristic of scientific method includes except _____ **experimental proof.**
37. traces the development of an issue over time _____ **context review.**
38. Increase in the percentage of failing students in a university exams may have reasons except _____ - **marking.**
39. A good review has points of agreement and as well as disagreement _____ **agree.**
40. Social research is used except _____ **increase social problems .**
41. Science is a way to produce knowledge , which could be _____ **based on truth and probably to be universal.**
42. Difference between formative and evaluation and summative evaluation is _____ **only final monitoring report .**
43. Relationship in hypothesis is proposed by using a strong logical _____ **argumentation .**
44. are the two purposes of developing a theory _____ **prediction and understanding .**
45. Failing of 67% students in a university exam is **Kind of problem** _____ **wastage of resources.**
46. A/An is the one which can take an uncountable set of variable. _____ **continuous variable**
47. Which one is the example of impact assessment research _____ **impact of bhasha dam on environment .**
48. Concept in isolation are nothing only when it is explained how concepts relation _____ **theories .**
49. Researchers try to make use of their findings for _____ **generating theories and models.**
50. A researcher interested in doing a nationwide survey among union workers , should first look at logical union _____ **to identify some basic problems .**
51. To answer a specific question or solve a social and economic problem we should go for applied **research.**
52. One of the **goals** of literature reviews is _____ **to learn from other and make idea .**
53. If you are given the research logic e.g, why girls are getting most of the top positions in different examination ? by studying _____ **identify problem.**
54. In research extraneous variables (EV) also known as confounding factor that may

- effect XY research _____ **researcher**.
55. 4 day workweek will lead to higher productivity (dependent variable) by increasing job satisfaction _____ **intervening variable**.
 56. When we think about theories , we are at the higher level of abstraction because we are investigation _____ **propositions**.
 57. summarizes what is known at a point in time _____ **integrative review**.
 58. The hypothesis should not only be specific to a place and situation but also these should be no..? _____ **operation**.
 59. Facts may leads a theory to _____ **rejection**.
 60. Applied and basic researcher adopt different orientation research methodology basic to _____ **conduct almost perfect research**.
 61. Labor force surveys population census and educational census are example of _____ **descriptive research**.
 62. Since theory summarize the known facts and predicts facts which have not been observed _____ **area which have not yet been explored**.
 63. science actually depends upon a continuous stimulation of _____ **fact ny theory and theory by fact** .
 64. Following are the types of variables in research except _____ **confirmatory variabile**.
 65. The concept stands for the phenomenon not the phenomenon itself hence it may called _____ **abstraction of empirical reality**
 66. In research the approach in which by repeating the observation researchers want to be defin..? _____ **positivism**.
 67. A concept is a generalized idea about a class of objects attributes or process _____ **name**
 68. We can create concepts from _____ **rumars around us and personal experience thoughts** .
 69. A manager may not doing any research he will have to understand pre..? _____ **dysfunctional to a organization**.
 70. Quota sampling and proportionate stratified sampling can be considered as same _____ **agreed**.
 71. Research is except _____ **running a successful business**.
 72. Research provides that guides us to make decision to solve aa problem _____ **planners**.
 73. The research findings could communicate that are effective. _____ **all above**.
 74. Researchers struggle with types of definitions _____ **two**.

75. The facts obtained from any experiment or survey are useful and are summarized in simple summarizing statement develop _____ it is possible to see relationship between the statement .
76. If you are given a topic for research the first step is _____ thinking the reason.
77. A single construct has Definitions _____ many.
78. Scientific research is effort ofmany researchers.
79. Proposition is a statement concerned with the Relationship among_____logical.
80. Organizes thesis by broad subject category author and date._____ dissertations.
81. imply the existence of or a change in one variable causes or led..?_____explanatory hypothesis.
82. is a coherent set of general propositions used as principles of phenomenon._____theory.
83. Following are the purposes of doing a research which one is incorrect_____informative research.
84. The Simply states that there is a relationship between the variable._____alternative hypothesis.
85. While defining theory what is the key element included?_____proposition.
86. are the two purposes of developing a theory ____- prediction and understanding .
87. Optional definitions are also called _____ working definitions.
88. The concept stands for the phenomenon not the phenomenon itself , hence it may called the _____ abstraction of empirical reality.
89. Specific communications for specific audience is more effective._____ agree.
90. Moving up the ladder of abstraction the basic concept because more abstract , wider in scope and less..?_____susceptible to measurement .
91. There are two ____ types of reviews _____ six.
92. To know the fundamental reason of a social reality is _____ research_____ academic.
93. Following is not a type of hypothesis._____ objective hypothesis.
94. If you are an owner of a company and suddenly company goes on losing business what will you do ? _____ find the reason and work accordingly.
95. Dictionary definitions are also _____ conceptual theoretical and nominal .
96. The simply states that there is a relationship between the variable under study _____ alternative hypothesis.
97. There are the propositions that describe a relationship between the

variable_____ **relational hypothesis.**

- 98.** Identification of concept is necessary because we use them in _____
hypothesis formulation.
- 99.** There are Basic feature that should be incorporated in any theoretical
framew..?_____ **6.**
- 100.** The process of establishing balue judgment based on evidence about the
achievement of the goals of a program is _____ **evaluation research.**
- 101.** Since theory summarizes the known facts and predicts Which have not been
observed it must also point to .._____ **areaas which have not yet been
explored.**
