

The reverse of the string sbfsbb over { sb, f, b }

Select the correct option

☐

bsfbsb

☒

bsbfsb

☐

bbsfbs

☐

sbbfsb

To examine whether a certain FA accepts any words, it is required to seek the paths _____ state.

Select the correct option

☐ from final to back final

☒ from initial to final

☐ from initial to initial back

☐ from final to initial

Click to Save Answer & Move to Next Question

A language ending with 'b' partitions Σ^* into _____ distinct classes.

Select the correct option

five

four

three

two

A non regular language can be represented by

Select the correct option

TG

None of the given options

FA

RE

Click to Save Answer & Move to Next Question

In a CFG, the non-terminals are denoted by _____.

Select the correct option

Capital letters

Small letters and numbers

Small letters

Numbers

Click to Save Answer & Move to Next Question

Question # 9 of 10 (**Start time: 06:12:32 PM, 05 August 2021**)

The CFG $S \rightarrow aSb|ab|\Lambda$ is used to express the language _____.

Select the correct option

☐	Palindrome
☐	Prime
☐	Even
☒	Equal

A problem that has decision procedure is called _____ problem.

Select the correct option

☐ un-decidable

☐ Infinite

☐ Regular language

☒ decidable

Click to Save Answer & Move to Next Question

In large FA with thousands of states and millions of directed edges, without an effective procedure it is _____ to find a path from initial to final state.

Select the correct option

- ☐ may be good
- ☐ always impossible
- ☐ Always easy
- ☒ Impossible

If the FA has N states, then test the words of length less than N. If no word is accepted by this FA, then it will _____ word/words.

Select the correct option

- ☐ reject no
- ☐ accept some
- ☒ accept no
- ☐ accept all

If there is no final state of two FAs then their _____ also have no _____ state

Select the correct option

union, final

final, union

union, initial

initial, union

Which of the following is pumped to generate further strings in the definition of Pumping Lemma?

Select the correct option

z

y

x

n

If a language generates finite number of distinct classes then it must be _____.

Select the correct option

- | | |
|----------------------------------|-------------------------------|
| ☐ | context free |
| ☒ | regular |
| ☐ | both regular and context free |
| ☐ | non-regular |

One language can have _____ CFG(s).

Select the correct option

☐ At most one

☒ More than one

☐ At least one

☐ Only one

Which of the following is used to delay the transmission of signal along the wire by one step (clock pulse)?

Select the correct option

☒ Delay box

☐ Reduce box

☐ Holdup box

☐ Slow box

Which of the following represent the absence and presence of current in sequential circuit respectively?

Select the correct option.

☒	0, 1
☐	0, 0
☐	1, 0
☐	1, 1

The values of input (say a & b) do not remain same in one cycle due to

Select the correct option

☒

NOT gate

☐

NAND gate

☐

Clock pulse

☐

OR gate

The language L defined over Σ , not belonging to L , is called _____ of the language L .

Select the correct option

☐

union

☐

intersection

☐

closure

☒

complement

Question # 3 of 10 (Start time: 12:47:37 PM, 05 August 2021)

Which of the following cannot be represented by a regular expression?

Select the correct option

- | | |
|----------------------------------|-----------------------------------|
| ☒ | String of 0's with a prime length |
| ☐ | Language of even-even |
| ☐ | Language of odd-odd |
| ☐ | String of 0's with an odd length |

Question 1 of 10 (Start time: 12:51:09 PM, 05 August 2021)

$a^n b^n$ generates the ____ language

Select the correct option

- | | |
|----------------------------------|-----------------------|
| ☐ | regular |
| ☐ | non regular |
| ☒ | EQUAL and non regular |
| ☐ | EQUAL and regular |

Question # 8 of 10 (Start time: 12:59:56 PM, 05 August 2021)

If L_1 and L_2 are regular languages then which statement is NOT true?

Select the correct option

L_1/L_2 is always regular

L_1^* is always regular

$L_1 + L_2$ is always regular

$L_1 L_2$ is always regular

Question # 9 of 10 (Start time: 01:00:30 PM, 05 August 2021)

Which of the following cannot be represented by a regular expression?

Select the correct option

- | | |
|-----------------------|-----------------------------------|
| ☐ | String of 0's with an odd length |
| ☐ | Language of even-even |
| ☐ | String of 0's with a prime length |
| ☐ | Language of odd-odd |

Question # 8 of 10 (Start time: 12:59:19 PM, 05 August 2021)

We have FA accepting the language L , now if we are going to find the complement of L , then we should

Select the correct option

- ☒ Change FA non final states into final and final states into non final states
- ☐ Change FA non final states into final states
- ☐ Change FA final states into non final states
- ☐ Only change FA old final states into non final states

Question # 10 of 10 (Start time: 01:01:02 PM, 05 August 2021)

If an effectively solvable problem has answer in YES or NO, then the solution is called _____

Select the correct option

decision procedure

finite solution

infinite problem

optimal procedure

Question # 6 of 10 (Start time: 12:50:45 PM, 05 August 2021)

Which one of the following languages is a non regular language?

Select the correct option

☐	Containing double a
☐	Even-even
☐	Start and end with same letter
☒	Palindrome

Question # 9 of 10 (Start time: 12:52:30 PM, 05 August 2021)

If R is regular language and Q is any language (regular/ non-regular), then $\text{Pref}(\text{_____ in } \text{_____})$ is regular.

Select the correct option

- | | |
|----------------------------------|--------|
| ☐ | R, R |
| ☐ | R, Q |
| ☐ | Q, Q |
| ☒ | Q, R |

Question 2

Which of the following is not a true theorem?

Select the correct option

Decidability theorem

Pseudo theorem

Myhill Nerode theorem

Equivalency theorem

Prime is a _____ language.

Select the correct option

☐	regular
☒	non-regular
☐	finite
☐	both context free and regular

Question # 10 of 10 (Start time: 12:53:47 PM, 05 August 2021)

The grammatical rules which involve meaning of words are called _____.

Select the correct option

semantics

syntactics

strings

alphabets

Question # 4 of 10 (Start time: 12:54:46 PM, 05 August 2021)

There is at least one production in CFG that has one _____ on its left side.

Select the correct option

☐	Null production
☐	Terminal
☐	Unit production
☒	Non terminal

Question # 2 of 10 (Start time: 12:56:49 PM, 05 August 2021)

The production $S \rightarrow SS \mid a \mid b \mid ^*$ can be expressed by Regular expression _____

Select the correct option

☐ $(a+b)^+$

☒ $(a+b)^*$

☐ $(a+b)$

☐ $(ab)^*$

Handwritten yellow text: "stop" with an arrow pointing to the selected option $(a+b)^*$.

Question # 10 of 10 (Start time: 01:02:00 PM, 05 August 2021)

For a non-regular language, there exists _____ FA.

Select the correct option

- | | |
|----------------------------------|--------------|
| ☐ | at least one |
| ☐ | at most one |
| ☒ | no |
| ☐ | one |

Question # 4 of 10 (Start time: 12:57:50 PM, 05 August 2021)

If $Q = \{xx, xyxyxy\}$, and $R = \{xyxyxyxyxy, xyxyxyxy\}$ then $\text{Pref}(Q \text{ in } R) =$ _____

Select the correct option

$xyxyxy$

$xyxyxy$

xy

xx

Question # 7 of 10 (Start time: 12:57:59 PM, 05 August 2021)

Finite Automaton (FA) must have _____ number of states while a language has _____ words.

Select the correct option

infinite, finite

infinite, infinite

finite, infinite

finite, finite

Search the web and Windows

Using Myhill Nerode theorem we partition Σ^* into distinct _____

Select the correct option

☒	classes
☐	instances
☐	templates
☐	objects

A non regular language can be represented by

Select the correct option

☒	None of the given options
☐	FA
☐	TG
☐	RE

Which one of the following languages is a non regular language?

Select the correct option

Start and end with same letter

Palindrome

Containing double a

Even-even

Question # 2 of 10 (Start time: 06:06:05 AM, 05 August 2021)

If new A = 1 NAND (1 AND 1), then what will be the value of new A?

Select the correct option

10

0

1

01

Question # 9 of 10 (Start time: 06:09:18 AM, 05 August 2021)

Even-Even language partitions Σ^* into _____ distinct classes.

Select the correct option

two

five

three

four

Question # 7 of 10 (Start time: 06:08:19 AM, 05 August 2021)

If L_1 and L_2 are two regular languages, then they _____ expressed by FAs.

Select the correct option

may or may not be

May be

can be

cannot be

Question # 6 of 10 (Start time: 06:07:59 AM, 05 August 2021)

If a language generates finite number of distinct classes then it must be _____.

Select the correct option

☒ regular

☐ context free

☐ non-regular

☐ both regular and context free

Question # 7 of 10 (Start time: 06:29:48 AM, 05 August 2021)

In CFG, symbols that cannot be replaced by anything are called _____.

Select the correct option

☒ terminals

☐ productions

☐ non-terminals

☐ null productions

Set of all palindromes over $\{a,b\}$ is:

Select the correct option

☐	Regular and infinite
☐	Regular
☐	Regular and finite
☒	Non-regular
